

SWEEPERS & VACUUMIZED SWEEPERS

Save Time While Keeping Your Facility Floors Free of Debris

Swish® and Sweepers.

From manual push sweepers to industrial rider sweepers, a dependable sweeper from Swish® will help you effectively and economically clean your facility, indoors and out.

Swish® carries a wide selection of highly efficient machines for every application and unique facility need.

5^{CE}

24 pounds of dirt can be tracked into a facility by only 1,000 people coming through an entrance in a 20-day work month. Not only does this excess of soil need to be cleaned on a regular basis but it can severely reduce the life of your floor finish, resulting in an increase of labour costs related to stripping and refinishing your facility floors.

Including sweeping to the pre-routine floor maintenance both inside and outside your facility helps mitigate soil build-up on your floors, ultimately saving you time and money.

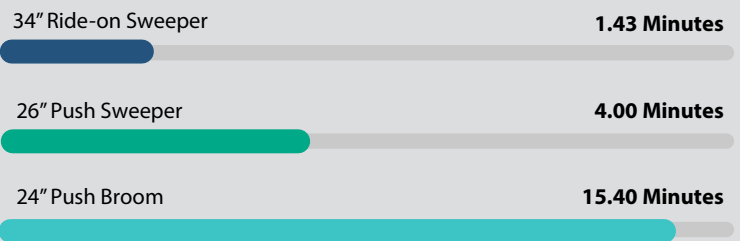

Common Particulates and Debris

Debris and particulates on a facility floor not only decrease the life span of your floor finish but also have adverse effects on facility image and employee and patron safety. Adding sweeping to your floor maintenance program will prolong the life of your floors and keep your facility safe and looking professional. Below is a list of contaminants commonly found on facility floors.

- ✓ Wood chips
- ✓ Paper shreadings
- ✓ Metal shavings
- ✓ Sand
- ✓ Rock salt
- ✓ Stones/pebbles
- ✓ Leaves

Productivity Gains

Choosing the proper sweeper for your application starts with an understanding of the relative performance capabilities of each type of sweeper. The chart below depicts productivity comparisons of manual push and ride-on sweepers versus a standard 24" push broom when sweeping a 1000 sq ft area.

Swish^{TECH} Experts in Cleaning Equipment Service and Repair Since 1956.

Our factory trained and certified technicians provide professional service and training, as well as quick access to OEM spare parts, on all types of maintenance equipment, whether purchased from Swish® or elsewhere. We service all makes and models including:

- Sweepers • Pressure washers • Vacuums
- Auto scrubbers & floor machines • Small engine repair

Manual Push Sweepers

- Manual sweepers are often the most compact, requiring no power source for operation and are simply operated by pushing the machine in the path you would like to clean.
- Faster and more efficient than a broom. A push sweeper is an easy way to clean paths, halls and sidewalks quickly and conveniently.

FEATURED MODEL

Kärcher KM 70/20 C Sweeper

Product Code: 15171060

- Up to 28" cleaning path (w/ side brush engaged)
- Indoor or outdoor use
- Adjustable main sweeper roller and side brush
- Ergonomic fold-down push handle
- Fine dust filter

3 additional models available in this style

Powered Walk-Behind Sweepers

- Powered walk behind sweepers produce a powerful sweeping action to control litter and fine particulates on hard surfaces.
- Compact and extremely maneuverable a powered, walk-behind sweeper is ideal for the thorough cleaning of small to medium-sized areas. The no-push drive reduces fatigue making them easier to operate, indoors or outdoors.

FEATURED MODEL

Kärcher KM 75/50 W

Product Code: 95127000

- Up to 30" cleaning path (w/ side brush engaged)
- Self-propelled drive
- Filtered vacuum dust control system
- Adjustable main sweeper broom and side brush
- Maintenance free AGM battery

9 additional models available in this style

Ride-On Sweepers

- Ride-on sweepers can withstand harsh indoor/out-door environments and clean for extended periods of time by sweeping debris into the large onboard hopper.
- Designed for large industrial facilities and parking lots, ride-on sweepers provide an efficient method of dust and debris control when the highest level of productivity is necessary.

FEATURED MODEL

Powerboss Apex 47

Product Code: PB40BLQP

- Up to 47" cleaning path (w/ side brushes engaged)
- Filtered vacuum dust control system
- Manual hopper dump
- Large diameter main broom allows for sweeping of heavier debris
- Automatic shut-off safety seat
- Can be used in damp environments

14 additional models available in this style
